QR Code

(deformed low quality code — „1MB24")

(low resolution code — encoded full vCard business card)

(entire alphabet — capital letters and numbers repeated few times)

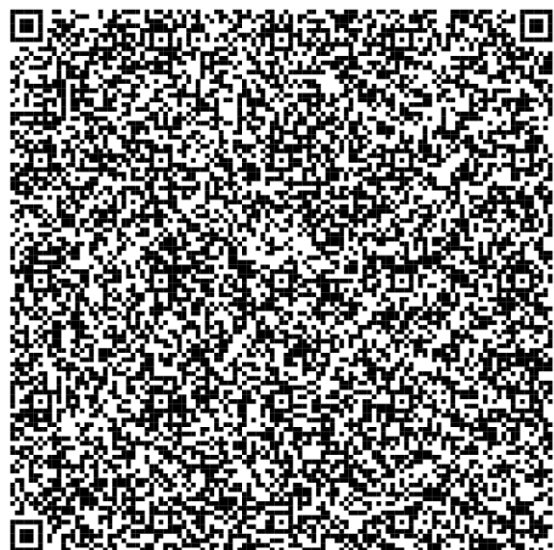

(codes with overlayed company logo; some scanners can't read IBM one)

(deformed code inside bigger image — http://setjapan.com)

(large number of data encoded —long list of URL addresses)

Barcode Scanner plugin reads QR Code on all supported platforms.
