UPC

(*UPC A — encoded number below; all digits except „N" letter*)

(*UPC A— encoded all digits shown below*)

(*UPC A and UPC E; first code is fine — „042100005264", second is read differently by some scanners as either „042720000069" or „04272649"*)

(*UPC A — encoded all digits below*)

(some sources claims, that these are *UPC A and EAN 13 types —Barcode Scanner plugin reads boths of them as UPC A type*)

(*UPC E with additions — „01234565" — additional codes not recognized*)

(*low quality UPC E— encoded all digits below*)

(*very low quality UPC E — „03084009"*)

Barcode Scanner plugin reads UPC_A and UPC_E code types on all supported platforms.
